

Pro Cooperative's Cattle Mineral Tubs

Pro Cooperative is excited to announce its own line of mineral lick tubs!

Featuring 30% protein and Availa - 4 tubs, Pro Cooperative looks to increase the producer's decision power and provide more offerings in the retail feed market.

All tubs are manufactured with corrugated plastic to increase durability.

Pro's 30% protein tubs are great for supplementing cattle on roughage diets, while the Availa-4 tub provides the efficacy of trace minerals that are often missing from cattle on pasture.

30% PROTEIN
Cooked Molasses Tub
For Cattle on Pasture or Roughage Rations

Weight: 250 pounds per tub

Feed Pro Cooperative's 30% Protein Cooked Molasses Lick Tub free-choice to beef cattle on pasture or roughage rations.

Recommended consumption is 0.75 to 1.00 pounds per head per day. Provide at least one tub for every 15 to 20 animals.

AVAILA®-4 MINERAL LICK
Cooked Molasses Tub

A Free-Choice Supplement for Beef Cattle on Pasture or Roughage Rations
Contains ZINPRO® Organic Trace Minerals for Increased Bioavailability

Weight: 225 pounds per tub

Feed Pro Cooperative's Availa -4 Mineral Lick Cooked Molasses Tub free-choice to beef cattle on pasture or roughage rations.

Recommended consumption is 0.25 to 0.50 pounds per head per day. Consumption of 0.50 pounds per head per day will provide 7 grams of Availa -4.
